Summer has sadly come to end but that doesn't mean you have to give up your weekend escapes to the Hamptons, especially when there are awesome places like [Marram Montauk](#) where you can stay. This design-centric hotel, created by hospitality company [Bridgeton](#), also features Mostrador, the property's cafe which is under the helm of internationally-renowned culinary team Fernando Trocca & Martín Pittaluga, offers the finest in luxury where guests can bask in all things luxury while soaking in the views of the Atlantic Ocean.

The posh property features 96 guest rooms, an open communal lobby, a dedicated

retail space for local tokens and beach must-haves, as well as a South American café where you can dine in style.

The hotel also sits on lush, untouched landscape where you can truly soak in Montauk's natural beauty by taking a walk in one of its secluded pathways carved throughout the property's lush landscaping or soaking in the wild botanical balusters that will greet you upon arrival.

You'll also swoon over the interiors where you will find light, muted tones, exposed white oak lumber beams, hand-textured plaster walls, hand-woven rugs, and bedside tables and stools made from Suar wood reclaimed from old homes and fishing boats, various pieces from beach and surf photographer Brian Biemann and minimalist line-work from Rhode Island-based musician and artist Sean Spellman, to name a few features.

Additionally, the hotel is also focused on substantial luxury, vast relaxation, and onsite and offsite experiences where guests can enjoy surfing lessons, sunrise meditation, wellness workshops, yoga, and guided walks.

The property is located at 21 Oceanview Terrace Montauk, NY, alongside Shadmoor State Park. For additional information, please visit [Marram Montauk](#).
